1 Notes to Users

2 Financial Highlights

Consolidated Results

- 5 Statements of income
- 6 Revenue from trading activities
- 7 Non-interest expense

Segment Details

- 8 Personal & Commercial Banking
- 9 Canadian Banking
- 10 Wealth Management
- 11 Insurance
- 12 Investor & Treasury Services
- 13 Capital Markets
- 14 Corporate Support

On- and Off-Balance Sheet

- 15 Balance sheets (period-end balances)
- 16 Selected average balance sheet items
- 16 Assets under administration and management
- 16 Statements of comprehensive income
- 17 Statements of changes in equity
- 18 Securitization

Capital

- 21 Basel III regulatory capital and ratios (all-in basis)
- 23 Regulatory capital balance sheet
- 25 Flow statement of the movements in regulatory capital
- 26 Total capital risk-weighted assets
- 27 Market Risk - Risk-weighted assets by approach (all-in basis)
- 28 Total capital risk-weighted assets by business segments (all-in basis)
- 28 Movement of total capital risk-weighted assets by risk type (all-in basis)
- 28 Attributed capital

Page

Capital (continued)

- 29 Leverage ratio
- 30 Leverage ratio common disclosure template

Credit Quality

- 31 Loans and acceptances
- 32 Gross impaired loans
- 35 Provision for credit losses
- 36 Allowance for credit losses
- 38 Credit quality ratios

Credit Risk Exposure

- 39 Gross credit risk exposure by geography and portfolio
- 40 Reconciliation of gross credit risk exposure to balance sheet
- 41 Exposure covered by credit risk mitigation
- 41 Credit exposure by residual contractual maturity
- 42 Credit exposure of portfolios under the standardized approach by risk weight
- 42 Actual losses vs. estimated losses
- 42 Basel Pillar 3 back-testing (Internal ratings based)
- 43 Credit quality of advanced internal ratings based (AIRB) exposure - retail portfolios by portfolio and risk rating
- 44 Wholesale credit exposure by portfolio and risk rating
- 45 Realized gains and losses on available-for-sale securities
- 45 Trading credit derivatives
- 45 Other than trading credit derivatives positions
- 46 Fair value of derivative instruments
- 46 Derivatives - Notional amounts
- 47 Derivatives - Related credit risk
- 48 Market risk regulatory capital - Internal models-based approach VaR

49 Calculation of ROE and RORC

50 Key performance and Non-GAAP measures

50 Glossary

Notes to Users

These Consolidated Financial Statements are prepared in compliance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), International Accounting Standard (IAS) 34, *Interim Financial Reporting*, unless otherwise noted. Unless otherwise stated, monetary amounts are stated in Canadian dollars. This document is not audited and should be read in conjunction with our Q2 2016 Report to Shareholders and our 2015 Annual Report. Certain comparative amounts have been amended to conform to the current period's presentation.

Capital Disclosure Requirements related to Basel III Pillar 3

Capital main features disclosure provides a qualitative disclosure and sets out summary information on the terms and conditions of the main features of all capital instruments. We have also included the full terms and conditions for each of our capital instruments on our Investor Relations website at <http://www.rbc.com/investorrelations/quarterly-financial-statements.html>.

EDTF Disclosures

The Financial Stability Board's Enhanced Disclosure Task Force (EDTF) issued a report titled "*Enhancing the Risk Disclosures of Banks*" in October 2012. The following index lists the disclosure related to these recommendations contained in this document.

Type of Risk	Recommendation	Disclosure	Page
Capital adequacy and risk-weighted assets	10	Composition of capital and reconciliation of the accounting balance sheet to the regulatory balance sheet	21-24
	11	Flow statement of the movements in regulatory capital	25
	13	Risk-weighted assets (RWA) by business segments	28
	14	Analysis of capital requirement, and related measurement model information	26-27
	15	RWA credit risk and related risk measurements	42-44
	16	Movement of risk-weighted assets by risk type	28
	17	Basel Pillar 3 back-testing	42
Credit risk	26	Bank's credit risk profile	31-44
		Reconciliation of gross credit risk exposure to balance sheet	40
	28	Reconciliation of the opening and closing balances of impaired loans and impairment allowances during the year	33, 37
	29	Quantification of gross notional exposure for OTC derivatives or exchange-traded derivatives	46
	30	Credit risk mitigation, including collateral held for all sources of credit risk	41

For a full index of where to find all EDTF related disclosures, see p. 55 of our Q2 2016 Report to Shareholders.

¹ Average common shares outstanding includes the impact of treasury shares held.

² This measure does not have a standardized meaning under GAAP. For further information, refer to the Key performance and non-GAAP measures section on page 50.

³ Effective Q3/14, different scalars are applied to the Credit valuation adjustment (CVA) included in the risk weighted asset calculation applicable to each of the three tiers of capital. This phase-in approach of CVA ends in Q4/18. During this phase-in period, RWA for Common Equity Tier 1 (CET1), Tier 1 capital and Total capital ratios will be subject to different annual CVA percentages. For the first two quarters of 2014, a 57% scalar was applied to CVA across all three tiers of capital. In Q3/14 and Q4/14, the CVA scalars are 57%, 65% and 77% applied to CET1, Tier 1 and Total capital respectively. 2015 and 2016 CVA scalars are 64%, 71% and 77%.

⁴ Ratios and calculations have been adjusted to exclude the change in fair value backing our policyholder liabilities from revenue and revenue growth. These are non-GAAP measures. Refer to page 50 for further details.

⁵ Growth rates are calculated based on earnings in the same period a year ago.

⁶ Commencing Q1/15 Asset-to-capital multiple and gross adjusted assets have been replaced with the leverage ratio and leverage ratio exposure respectively. The leverage ratio is calculated using OSFI leverage requirements guideline based on the Basel III framework. The leverage ratio is a regulatory measure under the Basel III framework and is not applicable for prior periods. Previously, the asset-to-capital multiple and gross adjusted assets were calculated on a Total Capital basis as per OSFI CAR Guideline while the leverage ratio is based on the Tier 1 capital.

¹ This measure does not have a standardized meaning under GAAP. For further information, refer to the Key performance and non-GAAP measures section on page 50.

² Amounts have been revised from those previously presented.

³ As at Q2/16, average personal secured loans was \$60.3 billion and average personal unsecured loans was \$21.0 billion. The loans are secured by securities, residential real estate, automotive assets and government guarantees.

⁴ AUA represents period-end spot balances and includes securitized residential mortgages and credit card loans as at April 30, 2016 of \$19.8 billion and \$9.9 billion, respectively (January 31, 2016 - \$20.4 billion and \$9.7 billion; April 30, 2015 - \$22.5 billion and \$7.9 billion).

⁵ This is a non-GAAP measure. For further information, refer to the Key performance and non-GAAP measures section on page 50.

¹ We completed the acquisition of City National on November 2, 2015. For Q2/16, our acquisition contributed earnings of \$66 million, which reflected revenue of \$468 million, non-interest expense of \$392 million, including \$71 million (\$42 million after-tax) of integration costs and amortization of intangibles, and PCL of \$7 million.

² Gains (losses) on investments in mutual funds used as economic hedges included in revenue and related variability in market-linked compensation expense in our U.S. Wealth Accumulation Plan.

³ Amounts have been revised from those previously presented.

⁴ This measure does not have a standardized meaning under GAAP. For further information, refer to the Key performance and non-GAAP measures section on page 50.

⁵ For Q2/16, includes \$531 million related to acquired credit impaired loans, with over 80% covered by loss-sharing agreements with the Federal Deposit Insurance Corporation.

⁶ Excludes assets held by clients of Phillips, Hager & North Investment Management Ltd. for which we earn either a nominal or no management fee. Q2/16 AUM excludes \$0.4 billion of these assets.

⁷ Q2/15 includes \$4 million (Q4/14 - \$6 million) related to the impairment of other intangibles.

⁸ This is a non-GAAP measure. For further information, refer to the Key performance and non-GAAP measures section on page 50.

¹ Premiums and deposits equals net earned premiums excluding the cost of premiums to other institutions for reinsurance coverage, plus segregated fund deposits.

² Investment income can experience volatility arising from fluctuation in the fair value through profit or loss (FVTPL) assets. The investments which support actuarial liabilities are predominantly fixed income assets designated as at FVTPL and consequently changes in fair values of these assets are recorded in Insurance premiums, investment and fee income in the consolidated statements of income. Changes in fair values of these assets are largely offset by changes in the fair value of the actuarial liabilities, the impact of which is reflected in insurance policyholder benefits and claims.

³ Beginning in Q1/15, results include a change in Canadian tax legislation impacting business operations of certain foreign affiliates which became effective November 1, 2014.

⁴ This measure does not have a standardized meaning under GAAP. For further information, refer to the Key performance and non-GAAP measures section on page 50.

⁵ Premiums and deposits include premiums on risk-based insurance and annuity products, and individual and group segregated fund deposits, consistent with insurance industry practices.

⁶ The revenue impact of the change in fair value on investments backing policyholder liabilities is reflected in Insurance premiums, investment and fee income and largely offset in PBCAE.

⁷ This is a non-GAAP measure. For further information, refer to the Key performance and non-GAAP measures section on page 50.

¹ Non-interest income is adjusted for teb commencing Q1/16.

² This measure does not have a standardized meaning under GAAP. For further information, refer to the Key performance and non-GAAP measures section on page 50.

³ Total compensation to revenue ratio is calculated as total human resources non-interest expense / total revenue (teb) for Front Office personnel and for functional support teams (Technology, Operations, and Functions). Total human resources non-interest expense includes salary, benefits, stock based compensation, retention costs, and variable compensation.

⁴ Q3/14 includes \$2 million related to the impairment of other intangibles.

⁵ This is a non-GAAP measure. For further information, refer to the Key performance and non-GAAP measures section on page 50.

¹ Calculated using methods intended to approximate the average of the daily balances for the period, as applicable.

² Average total loans are reported net of allowance for loan losses. Average retail and wholesale balances are reported on a gross basis (before deducting allowance for loan losses).

³ To be read in conjunction with the Segment pages.

⁴ Amounts have been revised from those previously presented.

Total off-balance sheet arrangements outstanding securitized assets	39,177			42,319			37,770			38,828		

¹ Amounts reported are based on regulatory securitization reporting requirements as it includes our credit card loans. It excludes our Canadian residential mortgages under the National Housing Act Mortgage-backed securities (NHA MBS) program, which also encompasses our Canadian social housing mortgages. These amounts differ from, and are not directly comparable to amounts reported in our Report to Shareholders due to the differences between IFRS accounting and regulatory consolidation.

² Amounts represent credit card loans securitized greater than 90 days past due.

³ Comprised of multi-seller asset-backed commercial paper conduit programs. The outstanding securitized assets reflect our maximum exposure to loss for liquidity and credit facilities only, and excludes derivative transactions with RBC. Of the outstanding securitized assets, 100% of these are internally rated as investment grade.

⁴ Average annual net loss rates reflect impaired/past due assets. In our conduit programs, our risk of loss is significantly reduced due to the presence of first loss credit protection provided by the sellers of the financial assets. This protection provides an average coverage multiple as disclosed above, representing the number of times the credit enhancement provided by others, would cover losses. Refer to our 2015 Annual Report for a detailed discussion on credit protection and other factors, including additional credit enhancements which reduce our risk of loss.

⁵ Amounts are reported on a two-month lag.

Total capital RWA		18,087	71%	441,308	5,245	436,063					
		18,087	77%	441,308	4,160	437,148					

¹ Calculated using guidelines issued by OSFI under the Basel III All-in framework.

² Total exposure represents exposure at default which is the expected gross exposure upon the default of an obligor. This amount excludes any allowance against impaired loans or partial write-offs and does not reflect the impact of credit risk mitigation.

³ Represents the average of counterparty risk weights within a particular category.

⁴ The minimum capital requirements for each category can be calculated by multiplying the total RWA by 8%.

⁵ For credit risk, a majority of our portfolios use the Internal Ratings Based (IRB) Approach and the remainder use the Standardized Approach.

⁶ As per OSFI guidelines, the CVA regulatory capital charge applied to derivatives has a three tier capital approach with different scalars for each tier. 2015 and 2016 scalars percentages are the same and shown above.

⁷ CAR (Capital Adequacy Requirement) guidelines define banking book equities based on the economic substance of the transaction rather than the legal form or accounting treatment associated with the financial instrument. As such, differences exist in the identification of equity securities held in the banking book and those reported in the financial statements. Banking book equities are financial instruments held for investment purposes and are not part of our trading book, consisting of publicly-traded and private equities, partnership units, venture capital and derivative instruments tied to equity interests.

As at Q2/16, the amount of publicly-traded equity exposures was \$937 million and private equity exposures amounted to \$1,526 million. Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor.

⁸ The amount of available-for-sale securities held in the banking book that were "grandfathered" under CAR (Capital Adequacy Requirement) guidelines, and thus subject to a 100% risk-weighting until the end of 2017, was \$83 million for Q2/16.

⁹ The scaling factor represents a calibration adjustment of 6% as prescribed by OSFI under the Basel III framework and is applied to RWA amounts for credit risk assessed under the IRB Approach.

¹⁰ For credit risk, portfolios using the Standardized and IRB Approaches represents 17% and 71%, respectively, of RWA. The remaining 12% represents Balance Sheet assets not included in Standardized or IRB Approaches.

¹¹ For market risk RWA measurement, we use an internal models approach where we have obtained regulatory approval, and a standardized approach for products yet to be approved.

¹² Regulatory capital for our correlation trading portfolios is determined through the standardized approach as prescribed by OSFI. Therefore, we do not have a Comprehensive Risk Charge for these portfolios. Our securitization and resecuritization positions in our trading book also have capital requirements under the standardized approach. The changes in value due to market and credit risk in the securitization and resecuritization in the trading book are managed through the daily mark-to-market process. Furthermore, we employ market risk measures such as sensitivities to changes in option-adjusted spreads and underlying asset prices as well as VaR and stress testing measures.

¹³ The incremental risk charge (IRC) was \$1,026 million as at Q2/16. The average was \$999 million, high was \$1,094 million and low was \$894 million for Q2/16. The IRC is measured over a one-year horizon at a 99.9% confidence level. We utilize a technique known as the Monte Carlo simulation process to generate a statistically relevant number of loss scenarios due to ratings migration and default in order to establish the losses at that confidence level. We also make certain assumptions about position liquidity (the length of time to close out a position) within the model that range from a floor of three months to maximum of one year. The determination of liquidity is based on issuer type and credit rating. Credit rating migration and default probabilities are based on historical data.

¹⁴ The models are subject to the same internal independent vetting and validation procedures used for all regulatory capital models. Important assumptions are re-reviewed at least annually. Due to long time horizon and high confidence level of the risk measure, we do not perform back-testing as we do for the VaR measure.

¹⁵ For operational risk, we use the Standardized Approach.

¹ Organic changes in portfolio size and composition (including new business and maturing loans).

² Quality of book changes caused by experience such as underlying customer behaviour or demographics and credit migration.

³ Updates to the model to reflect recent experience, model implementation, change in model scope or any change to address model malfunctions including changes through model calibrations/realignments.

⁴ Methodology changes to the calculations driven by regulatory policy changes.

⁵ Change in risk due to position changes and market movements.

⁶ Our capital allocation methodology is annually revised to anticipate and incorporate any changes in the regulatory (Basel and/or OSFI) environment that affects our capital requirement. As such, effective 2014, attributed capital includes the Credit Valuation Adjustment (CVA) as prescribed by OSFI. Effective Q1/16, we increased our capital attribution rate to better align with higher regulatory capital requirements.

⁷ Under/(over) attribution of capital is reported in Corporate Support.

LEVERAGE RATIO
Summary comparison of accounting assets vs. leverage ratio exposure measure - transitional basis
(Millions of Canadian dollars)

1	Total consolidated assets as per published financial statements
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation
3	Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure
4	Adjustments for derivative financial instruments
5	Adjustment for securities financing transactions (SFT) (i.e., repo assets and similar secured lending)
6	Adjustments for off-balance sheet items (i.e., credit equivalent amounts of off-balance sheet exposures)
7	Other adjustments
8	Leverage Ratio Exposure - (transitional basis)

¹ Based on OSFI's Leverage Requirements Guidelines issued October 2014.

² Effective Q3/15, we commenced excluding from Leverage exposure all qualifying cash variation margin provided by RBC to a counterparty that meets the criteria specified under OSFI's Leverage Requirements Guideline. These are recorded as receivables on our Balance Sheet and are not required to be included in Leverage exposure.

¹ Certain GIL movements for Canadian Banking retail and wholesale portfolios are generally allocated to New Impaired, as Return to performing status, Net repayments, Sold, and Exchange and other movements amounts are not reasonably determinable. Certain GIL movements for Caribbean Banking retail and wholesale portfolios are generally allocated to Net repayments and New Impaired, as Return to performing status, Sold, and Exchange and other movements amounts are not reasonably determinable. For Q1/16, Exchange and other movements includes \$680 million of acquired credit impaired loans from City National at the acquisition date.

² Includes acquired credit-impaired loans related to the acquisition of City National.

³ Geographic information is based on residence of borrower, net of allowance for impaired loans.

¹ Gross credit risk exposure is before allowance for loan losses. Exposure under Basel III asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal.

² Includes contingent liabilities such as letters of credit and guarantees, available-for-sale debt securities, deposits with financial institutions and other assets.

³ Includes repurchase and reverse repurchase agreements and securities lending and borrowing transactions.

⁴ For derivative related credit risk, we utilize the OSFI prescribed Current Exposure Method. Wrong-way risk, which arises when the exposure to a counterparty is positively correlated to the probability of default of that counterparty, is considered in our determination of exposure.

⁵ Credit equivalent amount after factoring in master netting agreements.

⁶ Geographic profile is primarily based on country of residence of the borrower.

¹ Eligible financial collateral includes cash and deposits, as well as qualifying debt securities, equities and mutual funds.

² Under the IRB Approach, disclosure on eligible financial collateral is not required as the benefit the collateral provides has been taken into account in the Loss Given Default (LGD) estimates in our internal LGD risk rating system.

³ Includes contingent liabilities such as letters of credit and guarantees, available-for-sale debt securities, deposits with financial institutions and other assets.

⁴ Includes repurchase and reverse repurchase agreements and securities lending and borrowing transactions.

⁵ Credit equivalent amount after factoring in master netting agreements.

⁶ Represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before allowance for loan losses and does not reflect the impact of credit risk mitigation.

¹ Represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before allowance for loan losses and does not reflect the impact of credit risk mitigation.

² To determine the appropriate risk weight, credit assessments by OSFI-recognized external credit rating agencies of S&P, Moody's, Fitch and DBRS are used. For rated exposures, primarily in the sovereign and bank classes, we assign the risk weight corresponding to OSFI's standard mapping. For unrated exposures, mainly in the business and retail classes, we generally apply OSFI prescribed risk weights in accordance with OSFI's standards and guidelines taking into consideration certain exposure specific factors including counterparty type, exposure type and credit risk mitigation technique employed.

³ Actual loss reflects internal credit loss experience realized over a given period. Actual loss rate is the sum of provision for credit losses on impaired loans divided by average of loans and acceptances period end outstanding for the current and prior 3-quarter period.

⁴ Estimated loss represents expected loss which is calculated using the Basel III "through the cycle" parameters of probability of default x loss given default x exposure at default, estimated based on available historical loss data. Estimated loss rate is the expected loss divided by loans and acceptances outstanding at the beginning of the applicable consecutive 4-quarter period defined above. Actual loss will normally exceed estimated loss during economic downturns and come below in periods of expansion.

⁵ Average annual actual loss rate from fiscal 2003 through to the most recent full year. The information is updated on an annual basis and is based on consolidated results. The Average historical actual loss rate on a continuing operations basis is 0.36%.

⁶ Back-testing is performed to check the effectiveness of the models used to measure PD, LGD and EAD. Estimated percentages are as of January 31, 2015 (January 31, 2014 for Retail LGD) and actual percentages reflect experience in the following 12 months (24 months for Retail LGD).

⁷ For retail, EAD rate represents the utilization of the authorized credit limit. For wholesale, EAD rate represents the utilization of the undrawn amount where the undrawn amount is equal to the authorized credit limit minus the outstanding balance.

⁸ Estimated percentages are as of October 31, 2014 (October 31, 2013 for Retail LGD) and actual percentages reflect experience in the following 12 months (24 months for Retail LGD).

¹ Total exposure includes loans outstanding (drawn) and undrawn commitments and represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before allowance for loan losses and after credit risk mitigation.

² Represents the exposure-weighted average probability of default, loss given default rate, exposure at default (EAD) rate and risk weight within each risk range. Average LGD for insured residential mortgages is based on the adjustment approach where the impact of related insurance is considered. EAD rate is a percentage of undrawn.

**WHOLESALE CREDIT EXPOSURE
BY PORTFOLIO AND RISK RATING**
(Millions of Canadian dollars, except percentage amounts)

¹ Comprises credit default swaps, total return swaps, credit default baskets and credit default options. As at Q2/16, over 95% of our net exposures are with investment grade counterparties.

² Gross fair value before netting.

³ Replacement cost includes the impact of netting but excludes collateral.

⁴ Comprises credit default swaps.

¹ As at Q2/16, positive and negative fair values exclude market and credit valuation adjustments of \$1.3 billion and \$0.1 billion respectively that are determined on a pooled basis.

² Impact of offsetting derivative assets and liabilities on contracts where we have both (a) unconditional and legally enforceable netting agreement in place and (b) we intend to settle the contracts on either a net basis or simultaneously. The right of setoff is considered unconditional if its exercise is not contingent upon the occurrence of a future event; it is considered conditional if it becomes exercisable only upon the occurrence of a future event, such as bankruptcy, insolvency, default, or change in control.

³ Additional impact of offsetting credit exposures on contracts that do not qualify for balance sheet offset.

⁴ Notional amounts do not represent assets or liabilities and therefore are not recorded in our Consolidated Balance Sheet. As of Q2/16, the notional amounts excludes exchange traded options written of \$117.9 billion, over-the-counter options written of \$313.9 billion and non-trading credit derivatives of \$0.3 billion. It includes interest rate and cross currency swaps of \$8.4 billion related to a consolidated structured entity.

⁵ The majority of non-centrally cleared over the counter derivative activity is conducted with other professional market counterparties, under bilateral collateral arrangements with very low unsecured thresholds and daily collateral valuations. These collateral arrangements take the form of Credit Support Annex, to the International Swaps and Derivatives Association master agreement.

⁶ Comprises precious metal, commodity, stable value and equity-linked derivative contracts.

¹ As at Q2/16, the notional amounts excludes exchange traded options written of \$117.9 billion, over-the-counter options written of \$313.9 billion, and non-trading credit derivatives of \$0.3 billion.

² As at Q2/16, the risk-weighted equivalents for over-the-counter contracts shown are calculated by applying risk weights against the credit equivalent amounts net of credit valuation adjustment (CVA) losses of \$259 million. The risk-weighted equivalent amounts shown do not reflect CVA regulatory capital charge.

³ Comprises credit default swaps, total return swaps, credit default baskets and credit default options.

⁴ Comprises precious metal, commodity, stable value and equity-linked derivative contracts.

⁵ As at Q2/16, the total credit equivalent amount reported above is net of \$17.8 billion in collateral and does not reflect the netting of the credit valuation adjustment losses of \$259 million described in footnote 2.

Stressed VaR		62	55	73	42	67	64	66	78	81	66	57	53

¹ The table shows VaR and stressed VaR for trading activities that have a capital requirement under the internal models-based approach, for which we have been granted approval by OSFI. Regulatory capital for market risk is allocated based on VaR and stressed VaR only for those trading positions that have approval to use the internal models-based approach. The above numbers reflect calculations for VaR and stressed VaR based on a 1 day time horizon. As stipulated by OSFI, RBC's Market Risk regulatory capital calculations are based on VaR and stressed VaR measures for a 10 day time horizon.

¹ Business segment ROE is based on Average attributed capital. Under/(over) attribution of capital is reported in Corporate Support.

² We do not report ROE and RORC for Corporate Support as they are considered not meaningful.

Key performance and Non-GAAP measures

Management measures and evaluates the performance of our consolidated operations and each of our segments based on variety of financial measures. In addition to generally accepted accounting principles (GAAP) prescribed measures, we use certain non-GAAP measures and key performance measures. We believe these measures provide useful information to investors regarding our financial condition and result of operations. For details, refer to the "How we measure and report our business segments" section of our Report to Shareholders. Readers are cautioned that non-GAAP measures do not have any standardized meanings prescribed by GAAP and therefore are unlikely to be comparable to similar measures disclosed by other companies.

Performance measures

Attributed capital (Economic capital)

An estimate of the amount of equity capital required to underpin risks. It is calculated by estimating the level of capital that is necessary to support our various businesses, given their risks, consistent with our desired solvency standard and credit ratings.

Risk capital

Risk capital includes credit, market (trading and non-trading), insurance-specific, operational, business and fixed assets risk capital.

Average risk capital

Calculated using methods intended to approximate the average of the daily risk capital balances for the period.

Return on equity (ROE)

Business segment return on equity is calculated as net income available to common shareholders divided by Average attributed capital for the period and using methods that are intended to approximate the average of the daily balances for the period. Corporate Support also includes average unattributed capital. ROE is based on actual balances of average common equity before rounding.

Return on risk capital (RORC)

Net income available to common shareholders divided by average risk capital. Business segment RORC is calculated as net income available to common shareholders divided by average risk capital for the period. RORC is based on actual balances of average common equity before rounding.

Unattributed capital

Unattributed capital represents common equity in excess of common equity attributed to our business segments and is reported in the Corporate Support segment.

Non-GAAP measures

Adjusted basis measures

Adjusted basis measures such as adjusted net income available to common shareholders, adjusted diluted earnings per share (EPS) and adjusted ROE are calculated by adding back to net income the after-tax amount of amortization of intangibles (excluding amortization of software), any goodwill impairment, the dilutive impact of exchangeable shares, and other significant non-recurring items.

Adjusted efficiency ratio, operating leverage and revenue growth

The ratio and calculations are adjusted to exclude the change in fair value backing our policyholder liabilities from revenue and revenue growth. Refer to page 51 for the definition of the efficiency ratio, operating leverage and revenue growth.

Economic profit

Net income (loss) after non-controlling interests excluding the after-tax effect of amortization and write-down of other intangibles (excluding software) and goodwill less a capital charge for use of attributed capital.

Common equity

Common equity includes common shares, common treasury shares, retained earnings and other components of equity.

Credit quality ratios excluding City National

The ratios are adjusted to exclude the impact of our acquisition of City National.

Glossary

Definitions

Assets under administration (AUA)

Assets administered by us, which are beneficially owned by clients. Services provided in respect of assets under administration are of an administrative nature, including safekeeping, collecting investment income, settling purchase and sale transactions, and record keeping.

Assets under management (AUM)

Assets managed by us, which are beneficially owned by clients. Services provided in respect of assets under management include the selection of investments and the provision of investment advice. We have assets under management that are also administered by us and included in assets under administration.

Embedded value

The sum of the value of equity held in our Insurance segment and the value of in-force business (existing policies).

Goodwill and intangibles

Goodwill represents the excess of the price paid for the business acquired over the fair value of the net identifiable assets acquired. An intangible asset is an identifiable non-monetary asset without physical substance.

Glossary continued

Definitions

Gross-adjusted assets (GAA)

GAA are used in the calculation of the Assets-to-Capital multiple. They represent our total assets including specified off-balance sheet items and net of prescribed deductions. Off balance sheet items for this calculation are direct credit substitutes, including letters of credit and guarantees, transaction-related contingencies, trade-related contingencies and sale and repurchase agreements. Commencing Q1/15, the Asset-to-capital multiple and GAA have been replaced by with the leverage ratio and leverage ratio exposure respectively.

Taxable equivalent basis (teb)

Income from certain specified tax-advantaged sources is increased to a level that would make it comparable to income from taxable sources. There is an offsetting adjustment in the tax provision, thereby generating the same after-tax net income. We record teb adjustments in Capital Markets and record elimination adjustments in Corporate Support.

Total trading revenue

Total trading revenue is comprised of trading related revenue recorded in Net interest income and Non-interest income.

Net impaired loans

Gross impaired loans less the associated allowance for credit losses on impaired loans by portfolio.

Ratios

Capital ratios

The percentage of risk-adjusted assets supported by capital, using the guidelines of OSFI based on standards issued by the Bank for International Settlements and GAAP financial information.

Common Equity Tier 1 ratio

Common Equity Tier 1 (CET1) capital under Basel III comprises the highest quality of capital including common shares, retained earnings, accumulated other comprehensive income and other items. Regulatory adjustments such as goodwill and intangibles, deferred tax assets, and other components subject to threshold deductions are excluded from CET1 capital. This ratio is calculated by dividing CET1 by risk-weighted assets, in accordance with OSFI's Basel III Capital Adequacy Requirements guideline.

Efficiency ratio

Non-interest expense as a percentage of total revenue. For adjusted efficiency ratio refer to the non-GAAP measures on page 50.

Return on assets

Net income as a percentage of average assets.

Return on risk-weighted assets

Net income as a percentage of average risk-weighted assets.

Calculations

Assets-to-capital multiple

Total assets plus specified off balance sheet items, as defined by the Office of the Superintendent of Financial Institutions Canada (OSFI), divided by total regulatory capital.

Average balances (assets, loans and acceptances, and deposits)

Calculated using methods intended to approximate the average of the daily balances for the period.

Average common equity

Calculated using methods intended to approximate the average of the daily balances for the period. For the business segments, calculated using methods intended to approximate the average of the daily attributed capital for the period.

Average earning assets

Average earning assets include interest-bearing deposits with other banks, securities, assets purchased reverse repurchase agreements and securities borrowed, loans, and excludes segregated fund net asset and other assets. The averages are based on the daily balances for the period. Commencing Q2/15, average earning assets also include cash collateral and margin deposits and exclude insurance assets.

Capital charge

Calculated by multiplying the cost of capital by the amount of average common equity. The cost of capital is a proxy for the after-tax return that we estimate to be required by shareholders for the use of their capital.

Dividend yield

Dividends per common share divided by the average of the high and low share prices in the relevant period.

Diluted EPS

Diluted EPS is net income attributable to common shareholders divided by the average diluted shares outstanding. Both net income and number of shares outstanding have been adjusted for the impact of exchangeable shares.

Market capitalization

End of period common shares outstanding multiplied by the closing common share price on the Toronto Stock Exchange.

Net interest margin (average assets)

Net interest income as a percentage of total average assets.

Net interest margin (average earning assets)

Net interest income as a percentage of total average earning assets.

Net write-offs

Gross write-offs less recoveries of amounts previously written off.

Operating leverage

The difference between our revenue growth rate and non-interest expense growth rate. For adjusted operating leverage ratio, refer to the non-GAAP measures on page 50.

Revenue Growth

The growth rate is calculated based on revenue in the same period a year ago. For adjusted revenue growth, refer to the non-GAAP measures on page 50.

Risk-weighted assets (RWA) - Basel III

Used in the calculation of risk-based capital ratios as defined by the guidelines issued by OSFI based on Basel III effective January 1, 2013 and on the "Basel III: A global regulatory framework for more resilient banks and banking systems - December 2010 (rev June 2011)" issued by the Basel Committee on Banking Supervision (BCBS) and adopted by OSFI effective January 2013. A majority of our credit risk portfolios use IRB Approach and the remainder uses Standardized Approach for the calculation of RWA based on the total exposure (i.e. exposure at default, and counterparty risk weights). For market risk measurement we use the internal models approach for products with regulatory approval and a standardized approach for all other products. For Operational risk, we use the Standardized Approach. In addition, Basel III requires a transitional capital floor adjustment.
